

Rotary Table Dispense Option

For use with Super E, Pro Meter and Perfect Flow Systems

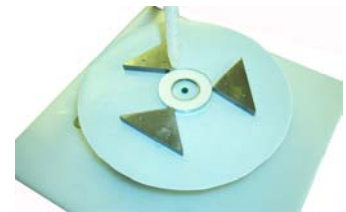

Considerably less expensive than XY system alternatives, our Rotary Table option offers the ability to dispense materials on circles from 24mm to 155mm in diameter. It is an excellent value for end cap gluing applications. Machine can be configured to meet your needs.

Can be configured with a variety of our machines including our electronic shot-control option

Quick disconnect allows for easy clean up between shifts

Magnetic positioning system allows for easy change-over to new sized end cap
